

my manifold evil ways and deeds, and I hope, parson
you will pray for me."

Buell himself could not have uttered words more entirely proper. He never seemed in haste to finish the conversation. He would follow the parent to the gate, still descending on the sinfulness of sin, and admitting every argument, and bringing it home upon himself.

with such a zeal that Dr. Hinton was obliged to leave him in the middle sense of *inlith* (twined) in Tommy's eyes, and happy was the child that needed his services after a visit from his mother, who, in the meantime, had contrived some new plaything, or rejoiced the urchin, with some queer story, and sent him home happy as a king!

Several other subordinate characters in the story afford Mr. Beecher an opportunity for the indulgence of the fun and frolic with which his nature overflows, and will not fail to find a place in the calendar of the lovers of comic situations by their odd and humorous originality. Among these we can only refer to Deacon Jerry Marble, the kindest heart that ever bubbled, who "spilt over" with merry good nature, and who "seemed afflicted when obliged to be sober,"—the strong-fledged, strong-minded, but true-hearted Agate Squire, the old Sawmill, the big-bellied, double-fisted, laughter-loving negro, King William of Deloraine, always "good at hand," the pensive sexton and undertaker, Mr. Turfmoil, and not forgetting the quizzical horse-fancier Hiram Beers, one of the omnipresent personages of country village, who "expected folks to call him home," and Hiram Beers, only on Sundays when he had his best or "freshest" clothes on, but week-days came and came on Hiram." The more prominent personages in the story, though happily imagined and well sustained, are not so characteristic as the subjects taken from the lower social strata, which always stimulate the merriment of the author to an exuberant outpouring of vivacity and humor. We began with saying that "Norwood" should not be regarded in the light of an imaginative work, and readers who take it up with this view may very probably be disappointed in its personal; but we close our notice with the assurance that it bears the decided impress of the genius of the author; and that is only another name for the passionate love of nature, a salient and sparkling humor, and an equal gift for depicting the noble and admirable traits of human character, and its grotesque and whimsical manifestations.

An *Autobiography of Elder Jacob Knapp*, the famous revival preacher, is published by Sheldon & Co. Boanewick tells his story in a plain, straight-forward manner, and throws not a little light on certain peculiar aspects of the religious world in America.

The Fourth Edition of Angell's standard treatise on *The Law of Carriers* is published by LITTLE, BROWN, & Co. It has been edited by Mr. JOHN LATHROP, a member of the Boston bar, who has with assistance of Mr. Walter, and effected more than a thousand changes referred to in the previous edition.

The Readings of Mr. Charles Dickens, as collected by himself, are collected in a neat volume, and published by Ticknor & Fields. The same house publishes a volume of Mrs. BEZZIE STONE's papers in the "Atlantic Monthly" entitled *The Chimney Corner*, discourses pleasantly, if not powerfully, on various miscellaneous topics of domestic and social interest.

The New-Jersey Rebellion, by JOHN Y. FOSTER (Newark: Martin R. Dennis & Co.), forms an important addition to the State histories of the services of the troops and people in aid of the Union cause. New-Jersey exhibits a highly honorable record of the patriotism and valor of her sons. No soldiers in the armies of the Republic fought with more chivalrous courage, or were inspired with a loftier spirit of devotion, than the soldiers of New-Jersey were surrounded by the scenes of the Revolution, and who inherited the memories of Monmouth at Princeton. Their energy and pluck won the admiration of the wisest commanders, while their gallant bearing everywhere commended them to popular favor. In this present volume, their services receive an appropriate memorial, which will contribute to the establishment of their place in the permanent history of the land. The biographical sketches of the prominent general officers of New-Jersey are full of interest, and present a noble counterpart to the bravery and devotedness of the rank and file.

The Constitution of the United States defined and carefully annotated, by GEORGE W. PARSONS, is the work of an eminent Southern jurist, now residing in the City of New York, and devoted to an exposition of the principles of the Constitution, as they are understood by the soundest and most learned commentators on that instrument. The author is a decided opponent of the doctrine of Nullification, and of the extravagant and untenable theory of States Rights which culminated in the outbreak of the Rebellion. Although a native of Georgia and a member of the bar in Texas, he never sided with the political speculators who regarded the Constitution as a mere compact between sovereign States, and habitually set aside at the pleasure of any one of the contracting parties. His views are lucidly set forth, and ably sustained in this volume. Every clause in the Constitution is made the subject of copious discussion; no position is taken without the support of ample authorities; and the results of the investigation are stated very briefly, but at sufficient length for easy comprehension. The work is suitable for study as a class-book in the higher schools, as well as for reference by the general reader. Its merits fully entitle it to an extensive circulation, and its introduction as a popular manual among the more intelligent classes of society would perform a valuable service in political education. (Washington: W. H. & O. H. Morrison.)
